

ELGIN OEM BROOMS

Longer Life, Better Value, Superior Sweeping!

All Elgin brooms are engineered to function precisely with the sweeper's key systems. Manufactured to strict OEM specifications, these brooms provide superior sweeping and longer life on Elgin sweepers than "will-fit" brooms. Exceptional sweeping begins with an exceptional broom.

Main Brooms- Made from 100% virgin polypropylene resin filament to resist abrasion, extend broom life and provide better flick action. Four to five tight end wraps ensures better pickup at the dirt shoe.

Pro-Sweep- With more broom wraps than will-fit brooms the Pro-Sweep has outstanding surface coverage and is the perfect choice for all general sweeping conditions. Maintains PM-10 compliance.

Saver Sweep- Lighter in weight than the Pro-Sweep, this popular broom offers excellent surface sweeping at an economical price.

Pro-Strip- Outstanding sweeping for high volume materials such as millings and leaves and performs very well in standard applications. Quick change out and easy shipping and storage are key features.

Heavy Duty Sweep- With 50% more filament than Pro-Sweep the Heavy Duty Sweep provides the best surface coverage and longest useful life of Elgin's main brooms.

Combo Sweep (Poly and Wire filaments)- For more aggressive sweeping, the Combo sweep is the broom of choice to sweep up affixed and compacted debris.

Section Sweep- With wire and/or poly wafers, this broom can be made to provide flick and cutting action. Convenient size boxes are easily stored and economically shipped.

Gutter Brooms- Designed to strict OEM specifications to function precisely with Elgin sweepers, these high quality brooms will provide many hours of sweeping service when used properly. Elgin gutter broom wire is superior oil tempered for outstanding flick action and better recovery than oil coated or oil quenched “will-fit” brooms.

Pro-Sweep- Densely packed with up to 24 wires per hole, the Pro-Sweep has excellent coverage and extended sweeping life. Sets the standard for gutter brooms and maintains PM-10 compliance.

Saver Sweep- With 18 wires per hole the Saver Sweep is very popular, economically priced and out performs standard will fit brooms. Available in 2, 4 or 5 segments to a set.

Aluminum Sweep- Identical to the Pro Sweep but it uses heavy duty aluminum segments that can be refilled.

Poly Sweep- Filled with heavy poly filaments the Poly Sweep is typically used for less aggressive, spark resistant, non-abrasive sweeping.

Aggressor XR- With a combination of wire cable and wire bristle, the XR cuts through thick mud and compacted debris. Ideal for weed removal, construction sites, milling applications and removing rubber at airports.

Aggressor XT- Made from heavy wire ropes the XT is the most abrasive side broom in the Elgin line-up and can handle all types of compacted debris.
